MANUAL SHRINK WRAPPING MACHINE

## K5 SERIES

## MANUAL SHRINK WRAPPING MACHINE

### Description

K5 Series is designed for packaging products in polyolefin (POF) or polyvinyl chloride (PVC) shrink film. It can be used where need of plastic packaging food, beverage, cosmetic, chemical, medical, paint, printing press, automotive, hardware etc.

### Application

The operator manually inserts products into the double-layer shrink film and then transfers the products to the sealing area by hand. The hood is closed to start the operation. The the hood is closed by an electronic hold down magnet during the film cutting-sealing and heat shrink wrapping operations. Automatic shrink hood opening after completion operation.

### Description

- 
- 
- 
- 
- 
- ✓ Sealing and shrinking in the one operation
  - ✓ Stainless resistance and resistance chamber
  - ✓ Time adjusting magnetic magnet
  - ✓ Height adjustable product basket for different products sizes
  - ✓ Width adjustable packing table for different product sizes
  - ✓ Automatic shrink hood opening after completion operation
  - ✓ Adjustable shrink time
  - ✓ Adjustable shrink heat
  - ✓ Adjustable cutting time
  - ✓ Easy and fast film exchange
  - ✓ Easy installation and simple operation

- ✓ Longevity
- ✓ CE certified
- ✓ 2 years warranty except wearable parts
- ✓ 5 Years spare parts supplier

## Technical Features

Model	K5 45/60	K5 55/70
Max product dimensions (L x W x H)	500x350x150 mm	600x450x200 mm
L-Sealing dimensions (L x W)	600x450 mm	700x550 mm
Power supply	220V-60Hz	220V-60Hz
Installed power	2,5 Kw	3,5 Kw
Production capacity (pack/h)	240-360	240-360
Film type	PVC/POF	PVC/POF
Film thickness	15-25 micron	15-25 micron
Reel width (mm)	550 mm	650 mm
Reel diameter (Ø)	250 Ø	250 Ø
Working plate height	900 mm	900 mm
Machines dimensions (LxWxH)	1300x850x1100mm	1400x1000x1100mm
Weight	100 kg	125 kg
